changeable letter signs

T & T Changeable Letter Signs can be set up quickly and easily by any one. The flanged letters and figures are automatically aligned when inserted in the grooved background assuring straight, evenly spaced copy that is neat and orderly in appearance — pleasing to the eye.

The new embossed PLASTIC NAME BASES are molded of tenite and produced by a special T & T process. They can be used on any changeable letter board converting it to a directory. METAL NAME BASES with cast metal letters also available.

the basic types of

INDOOR SIGNS AND DIRECTORIES

Style No. S-110 — PLAIN CONSTRUCTION

This type of sign is the simplest, lightest, least expensive and the most adaptable of any sign construction. It consists of a grooved, cork or chalk board composition background with a molding of metal channel, wood, or kalamein.*

Style No. S-120 — TAKE OUT BACK CONSTRUCTION

This is the least expensive of the glass covered signs. It can be displayed in congested areas or in a position that would be awkward for a swinging door because it is light enough to be easily removed to any convenient place where the background may be taken out and the sign lettered without interference from traffic. It is equipped with hangers for fastening to the wall. The outer frame may be metal channel, wood, or kalamein* molding.

Style No. S-125 — REMOVABLE FRONT CONSTRUCTION

This style of sign is also available with a REMOVABLE FRONT. The grooved background remains fastened to the wall while the REMOVABLE FRONT is easily removed for quick copy changes.

Style No. S-130 — OVERALL GLASS DOOR CONSTRUCTION

This is the most popular of all glass covered signs. Protection against dust and dirt, and against tampering is afforded by this style of construction. A glazed door is hinged against a backframe that holds the cork or grooved background. It is available with lock and key if desired and in wood or kalamein* moldings.

*Kalamein is metal drawn over a wood core.

Style No. S-188 — LEAST EXPENSIVE GLASS DOOR STAINLESS STEEL SIGN

20 gauge, 316 type alloy, 1-3/16" stainless steel molding with 1 1/2" depth, brushed finish. Inset door, piano hinge, D S A glass, with lock. Non-removable background grooved, cork or combination grooved and cork. Non-illuminated. Single door only.

Sizes	
20" x 30"	30" x 36"
24" x 36"	32" x 44"
28" x 40"	36" x 48"

Style No. S-189 — AVAILABLE IN 361-E MOLDING

Rolled stainless steel molding, 3/4", 20 gauge, 316 style alloy, brushed finish. Inset door, piano hinge, D S A glass. Lock in door. Removable background of grooved, cork, or combination grooved and cork. Surface or flush recess mounting. Non-illuminated. Available in single or double door styles in the following sizes:

Single Door: Sizes		
20" x 30"	28" x 40"	32" x 44"
24" x 36"	30" x 36"	

Double Door: Sizes	
48" x 24"	60" x 36"
48" x 36"	72" x 48"

Style No. S-186 DELUXE CONSTRUCTION

The T & T DeLuxe Sign combines unusually attractive appearance with utility. The wide variety of frame materials and background colors make it possible to select the combination that will blend with and more than complement any surroundings. This style features a set-in door with lock and is available with or without heading bar. It can be had in wood, kalamein, extruded bronze, nickel or aluminum molding and either grooved or cork background or a combination of the two. It may be hung on the wall or mounted on standards.

T & T DEEP-CORK TACK BOARDS

T & T Cork Background Tack Boards are made of 1/4 inch cork sheet cemented to 3/8 inch plywood back. Extra deep cork is used to make it easier to insert and withdraw thumb tacks. The cork face can be had in either green, natural cork color or covered with various colors of wool broadcloth if desired. Deep-Cork Tack Boards can be furnished with any T & T Changeable Letter Sign Frames. Combination grooved board and tack board backgrounds in one frame are also available.

changeable letters, flange plastic strips and cast metal nameplates

T & T Changeable Letters and Figures are of three types—die cut and formed flat celluloid, injection molded plastic and precision cast metal. Smooth rounded line-up flanges will not wear or scuff broadcloth covering.

Also available, but not shown here, are Flanged Plastic T

Bases which make it easy to insert or remove one or more names or words at a time. These are ideal where changeable letter signs are used as directories. Also not illustrated are the Cast Metal Word Plates. These can be made up in the seven sizes of metal letters shown below. Metal Word Plates are recommended for menu boards, or are excellent for headings.

**MOLDED PLASTIC
CHANGEABLE LETTERS**

DOUBLE FLANGE—From ¼" to 1½" high

**CAST METAL
CHANGEABLE LETTERS**

SINGLE FLANGE—From ¼" to 2" high

**BLOCK STYLE FLAT
CELLULOID CHANGEABLE LETTERS**

DOUBLE FLANGE—From ¾" to 2" high
